Sterile High Purity Water and Dry Wipes

Sterile High Purity Water is one of the simplest cleanroom solvents for surface cleaning. Water is an excellent solvent for ionic salts and sugars which are often used in preparations. In addition, it is ideal for removing disinfectant residues.

The multi-purpose sterile dry wipes are suitable for use with all disinfectants, alcohol and detergents.

STERILE HIGH PURITY WATER

- ∅ Also available in 1L bottle or 900ml Trigger Spray. Trigger Spray format is optimised to help reduce excessive strain on the operator.
- ∅ Validated in-use sterility for 13 weeks.
- ∅ 0.2 micron filtered and 25kGy gamma irradiated for sterility (20-45kGy for 5L products).
- ∅ Manufactured using WFI quality water guaranteeing a low endotoxin level (less than 0.25 EU/ml) and suitability for product contact areas.
- ∅ Double bagged and batch coded with Detex dot to clearly indicate successful irradiation.
- ∅ 2 year unopened shelf life.

**Not suitable for injection, ingestion, infusion or irrigation purposes.*
